Did You Know...

The sunshine vitamin: Vitamin D is produced in the skin in reaction to sunlight. People who don't get enough sunlight may need to take a supplement, as this vitamin only naturally occurs in a few foods, such as fatty fish.

Big lakes: Located between Asia and Europe, and bordering five countries, the Caspian Sea is the largest lake in the world. The second largest is Lake Superior, which straddles the Canadian-American border in North America.

Season: Earth is tilted at 23.5 degrees in relation to our orbit around the Sun. When the North Pole is pointed away from the Sun, it is winter in the northern hemisphere and summer in the southern hemisphere. Vice versa when the North Pole is pointed toward the Sun.

Odd sea creature: The dugong lives in the warm coastal waters of the Red Sea, Indian Ocean, and Pacific Ocean. This large mammal looks a little bit like a manatee. Dugongs are herbivores and like to eat sea grass.

Wind watch: Prevailing winds are winds blowing in their most frequent direction in a certain location. Depending on the latitude, prevailing winds generally blow from east or west, rather than from north or south.

On the Lighter Side

Teacher: "Why can't freshwater fish live in saltwater?"

Student: "The salt would give them high blood pressure."

If the world keeps getting smaller every day, why does the cost of a stamp keep going up?

What can run, but never walks? Has a mouth, but never talks? Has a head, but never weeps? Has a bed, but never sleeps? A river.

Starting next month, I'm going to stop procrastinating.

Where is the ocean the deepest? On the bottom!
