**Parang pumpkins:** When people think of carving pumpkins, scary or funny faces that frighten or amuse Halloween celebrants are what usually comes to mind. Angel Boraliev of Varna, Bulgaria, has different ideas. This pumpkin carver is an artist who sculpts amazingly realistic images and designs out of the lowly fruit. A pumpkin might be turned into a regal owl, a majestic eagle, a slithering snake, or a placid pelican. Along with pumpkins, Boraliev also enjoys using watermelons and soap as a medium.

**White deer:** The northern part of the state of New York (U.S.) is home to a rare white-tailed deer called the Seneca white deer. The animals of this type carry a recessive gene that makes their coats white instead of the usual brown. The herd was protected for many years by the Seneca Army Depot. When it closed in the 1990s, volunteers took over the care of the animals. No hunting is allowed in what is now a sanctuary for the deer, but their stark white fur makes the animals an easy target for predators. Today, the private owner of the property plans to continue to protect the herd.

**Chalky art:** Chalk is something very familiar to teachers and students. That was true for Sachin Sanghe, who came from the village of Mudugere in Karnataka, India. He took a liking to the material and started to carve things in it, starting with simple letters. Later, he carved intricate creations, such as hands, deities, and buildings. He took a break from his art to attend engineering school, but after graduating, he started carving again. His tiny sculptures can take many hours to complete, depending on the complexity. The artist admits that getting the job done requires a lot of concentration.

**Dish decorations:** Collectors of porcelain might have a cabinet or two filled with interesting finds, but a couple of cabinets would not nearly be enough to hold the collection of Nguen Van Truong of Kieu Son, Vietnam. He started collecting porcelain dishes back in the 1980s, and he became so obsessed that he soon had nowhere to put all of his acquisitions. He took some mortar, applied it to the walls of his home, and began the process of embedding the dishes into his house. Now, the inside and outside of his house are covered in about 10,000 pieces of colourful dishware.

# Recipe of the month

## Spring Pea Pasta

1 pound pasta  
3-4 cups fresh peas  
5 shallots, thinly sliced  
1 shallot, very finely diced  
1 cup chopped fresh mint  
1 cup chopped Italian parsley  
½ cup olive oil

2 lemons – zest and ¼ cup juice  
2 cups fresh pea shoots, baby spinach or arugula  
1 teaspoon salt (plus more to taste)  
½ teaspoon pepper  
1 tablespoon truffle oil  
Optional: goat cheese crumbles

Prep Time: 15 mins. Cook time: 10 mins. Yield: 4 (main) or 8 (side)

- Boil pasta in a generous amount of salted water per directions.
- During the very last minute of cooking, if serving this as a warm entrée, add the peas to the pasta and just lightly blanch.
- While the pasta is cooking, prep the rest of the ingredients.
- Chop the shallots, shallots and herbs.
- Zest two lemons, and measure out ¼ cup lemon juice.
- Once the pasta is just about done, add the peas to the boiling pasta water and blanch for one minute, or just until bright green. Immediately drain, place pasta and peas in large bowl, drizzle with olive oil, lemon juice and season with 1 tsp salt and ½ tsp pepper.
- Toss in the pea shoots (or other greens) and add the shallots, shallot, herbs and lemon zest. Stir.
- Taste, adjusting salt and lemon juice, adding more of both, if necessary.
- Drizzle with truffle oil; serve immediately.

*If making this as a pasta salad, rinse pasta and peas in very cold water to stop the peas from cooking any longer. Add goat cheese right before serving.*

# Did You Know...

**Hearing feet:** African elephants have the unique ability to "hear" with their feet. Far-off rumbles in the ground create vibrations that travel from their feet to their middle ear. The timing of the signals can indicate the direction of the sound's origin.

**Chef's trick:** When we sprinkle salt on our food, we usually do it close to the target. Chefs sprinkle seasonings from a height of as much as 12 inches (30 cm). This results in much more even distribution.

**No rabbits:** In the state of Queensland, Australia, owning a rabbit is illegal. That's because the critters have become a severe ecological threat. The government erected a rabbit-proof fence and has taken other measures to keep the population under control.

**Alarm system:** Royals in ancient Japan were ahead of their time. They purposely built squeaky floors as an anti-theft alarm system. These "nightingale floors" or *uguisu-bari*, are named after the Japanese nightingale, also known as the Japanese bush warbler.

**Unique banking:** When visiting Vatican City in Rome, people can practice Latin while doing their banking. An ATM in Vatican City has an option to do transactions in Latin, possibly the only machine in the world to offer such a service.
