**Alberta Has It All**

"Flatlands and rollin' plains, clear blue skies, prairie rains; a tapestry of colours in the fall. Snow covered mountain tops, wheat fields, canola crops; Alberta has it all." This is from our Alberta provincial anthem. That's just a smidge of it, because if we wrote the whole thing, well, you would miss our monthly wit and wisdom. Okay, maybe just our wit (haha).

There's no part in the anthem about our liquid assets. We mean of the alcohol type, of course. We make some wicked products in Alberta.

Beer... lots of fabulous beer of every size and type. We're in the spirit of things too with vodka, gin, whisky. Liqueurs, too. How about mead, coolers, fruit wines and pre-mixed cocktails... Albertans make those, too.

Come on everybody. Let's celebrate Alberta made products. We've got a ton to salute. *Cheers!*

## Everybody's Talking

**Power outage:** At one time, Austria intended to provide some of its electricity through nuclear power plants. Plans were in the making for three plants, and one was built in the 1970s. Called the Zwentendorf Nuclear Power Plant, it is approximately 32 kilometres (20 miles) from Vienna, on the Danube River. The only problem is that the plant was never turned on. That's because of a public outcry over the use of this kind of energy. The government never opened the plant, nor did it build the other two. Today, the plant is used as a security training centre and has been rented out for events and movie shoots.

**Icy roads:** In winter, people converge on a small, remote town in northern Sweden, a strange thing considering the icy cold temperatures in the region. The town is called Arjeplog, and the seasonal population surge occurs because the area has become a testing ground for European automakers. The frozen lakes allow brakes to be tested, and if they don't work very well, there is no chance the car will careen into rocks or mountainsides. Miles of specially groomed tracks are available for testing. The conditions are extremely snowy and icy, making it the ideal location for this purpose.

**Peaky place:** Someone traveling to Spain might want to consider a side trip to the city of Segovia, which is about 90 kilometres (56 miles) north of Madrid. Among the alluring architecture found there is one building not to be missed, called the Casa de los Picos, or the "House of Peaks." Built in the 1400s, its walls are covered with row upon row of small, granite, pyramid-shaped peaks that stick out far enough to be used as perches for pigeons. Over the centuries, the Casa de los Picos has been owned both privately and publicly. Currently, it is the home of the Segovia School of Art.

**Unique home:** Building a 16-sided house is unusual, but that is just what two cousins did in 18th-century England. Jane and Mary Parminster, who had been traveling with other female friends and relatives, came home to England and erected their house, known as A La Ronde, in Lymptone, Devon. Historical notes indicate that the cousins liked to move around the house for their meals, following the ample sunlight that came in through the various windows. The house changed hands over the years, and alterations were made, but today it is taken care of by the National Trust, which reverted it back to its original design.
