Everybody's Talking

Tilted building: Italy's Leaning Tower of Pisa isn't the only building in the world that looks like it might fall over at any minute. Taiwan's Chiayi County is home to the Taihe Zhenxing Palace, which is tipped at an angle of approximately 45 degrees. This structure was not built that way. Rather, in 2009, a strong typhoon caused rainfall and mudslides that moved the building downhill, many metres from its original spot. The structure is still intact, but its crazy angle is something to see. The palace is situated in an outof-the-way location, but that doesn't stop tourists from coming to take pictures of the curious sight

Acorn stash: A woodpecker in Santa Rosa, California (U.S.), was planning ahead. The bird had pecked many holes in the siding of a family's home and deposited hundreds of acorns into each one. The family knew they had a big problem when they noticed the holes, so they asked Nick's Extreme Pest Control to come to the rescue. When company owner Nick Castro cut into an interior wall, piles upon piles of acorns came tumbling out. In the end, Castro estimated that he cleared out 700 pounds of the nuts. The family ended up re-siding their home, and Woody the Woodpecker had to find a new place to stash its stockpile.

Bummer of a hum: The village of Holmfield, in West Yorkshire, England, is troubled by a mysterious sound, dubbed the Holmfield Hum. Not all residents can hear it, but for those who can, it's quite annoying because it affects their sleep and quality of life. The noise is apparently low frequency and can be compared to the sound of a washing machine or a diesel truck that has been left idling. Authorities in the village have hired experts to find out the cause, but so far, no luck. Of course they'll keep trying, but possibly some residents can hear the rumblings from industry in the area, and others do not.

Long train: What better way to celebrate a country's 175 years of rail travel than to drive the longest passenger train in the world through the Swiss Alps? That is what Rhaetische Bahn railway accomplished when it put 100 passenger cars together to make a train that measured 1.9 kilometres (1.2 mi.) long. The train took a 25-kilometre (15.5-mi.) journey through a terrain of sharp turns with many ups and downs, 22 tunnels, and 48 bridges. It went from Preda to Bergun in the eastern part of Switzerland. The feat involved seven drivers who had the skill to coordinate, with perfect synchronization, both acceleration and breaking. Luckily, they completed the trip with perfection.
